YEAR 12 Trial Exam Paper

2014

MATHEMATICAL METHODS (CAS)

Written examination 1

STUDENT NAME:

Reading time: 15 minutes

Writing time: 1 hour

QUESTION AND ANSWER BOOK

Structure of book

<i>Number of questions</i>	<i>Number of questions to be answered</i>	<i>Number of marks</i>
10	10	40

- Students are permitted to bring the following items into the examination: pens, pencils, highlighters, erasers, sharpeners and rulers.
- Students are NOT permitted to bring notes of any kind, sheets of paper, white out liquid/tape or a calculator into the examination.

Materials provided

- The question and answer book of 15 pages, with a separate sheet of miscellaneous formulas.
- Working space is provided throughout the question book.

Instructions

- Write your **name** in the box provided.
- Remove the formula sheet during reading time.
- You must answer the questions in English.

Students are NOT permitted to bring mobile phones or any other unauthorised electronic devices into the examination.

This trial examination produced by Insight Publications is NOT an official VCAA paper for the 2014 Mathematical Methods (CAS) Written examination 1.

The Publishers assume no legal liability for the opinions, ideas or statements contained in this Trial Exam.

This examination paper is licensed to be printed, photocopied or placed on the school intranet and used only within the confines of the purchasing school for examining their students. No trial examination or part thereof may be issued or passed on to any other party including other schools, practising or non-practising teachers, tutors, parents, websites or publishing agencies without the written consent of Insight Publications.

Instructions

Answer **all** questions in the spaces provided.

A decimal approximation will not be accepted if an **exact** answer is required to a question.

In questions where more than one mark is available, show appropriate working.

Unless otherwise indicated, the diagrams in this book are **not** drawn to scale.

Question 1 (7 marks)

a. Find $\frac{d}{dx}(x \sin(2x))$.

2 marks

b. For $f(x) = e^{\sqrt{x}}$, find $f'(4)$.

2 marks

- c. The average value of the function $f : (-\infty, 5) \rightarrow \mathbb{R}$, $f(x) = \frac{1}{5-x}$ over the interval $[1, k]$ is $\frac{1}{2} \log_e 2$.
Find the value of k .

3 marks

Question 2 (2 marks)

A transformation is defined by the matrix $\begin{bmatrix} 0 & 4 \\ -3 & 0 \end{bmatrix}$. Find the equation of the image of the graph of the line with the equation $2y - 3x = 5$ under this transformation.

Question 3 (5 marks)

Let $f : R \rightarrow R$, $f(x) = x^2 - 4x + 3$ and $g : R \rightarrow R$, $g(x) = |x|$.

- a. Find the rule for the function $f(g(x))$.

1 mark

- b. Sketch the graph of $y = f(g(x))$ on the axes below. Label axes intercepts and turning point(s) with their coordinates.

3 marks

- c. State the domain for which the derivative of $f(g(x))$ is defined.

1 mark

Question 4 (6 marks)

For $f : [0, 2\pi] \rightarrow \mathbb{R}$, $f(x) = -2 \sin(2x) - 1$.

- a. State the range and period of the function.

2 marks

- b. Sketch the graph of f on the axes below. Label axes intercepts and end points with coordinates.

3 marks

- c. $2\sin(2x) - 1 = p$ has four solutions over the domain $[0, 2\pi]$.

State the interval of values of p for which this will occur.

1 mark

THIS PAGE IS BLANK

Question 5 (3 marks)

Consider the function $f : (-\infty, 4) \rightarrow \mathbb{R}$, $f(x) = 3 \log_e(4 - x)$.

- a. Find the rule for the inverse function, f^{-1} .

2 marks

- b. On the axes below, sketch the graph of $y = f^{-1}(f(x))$.

1 mark

Question 6 (3 marks)

An inverted right circular cone has a diameter of 30 cm and a height of 40 cm, as shown in the diagram below

Water is poured into the cone at a rate of $6 \text{ cm}^3/\text{min}$.

Find the rate at which the height is increasing when the volume is $24\pi \text{ cm}^3$.

Question 7 (2 marks)

Joel has either an apple or a banana at morning tea break. If he has an apple one morning, the probability he has an apple the next morning is 0.3. If he has a banana one morning, the probability he has a banana the next morning is 0.4. Suppose he has a banana on a Monday morning. What is the probability that the next time he has a banana is not until the Friday morning?

Question 8 (2 marks)

Let X be a normally distributed random variable with a mean of 36 and a variance of 64. Let Z be the standard normal random variable.

- a. Find the value of c if $\Pr(Z > -1) = \Pr(X < c)$.

1 mark

- b. Find the value of d when $\Pr(Z < d) = \Pr(X > 20)$.

1 mark

THIS PAGE IS BLANK

Question 9 (4 marks)

The probability density function of a continuous random variable X is given by

$$f(x) = \begin{cases} k(2x+3) & 0 \leq x \leq 4 \\ 0 & \text{otherwise} \end{cases}$$

- a. Show that $k = \frac{1}{28}$.

2 marks

- b. Find $\Pr(X \leq 2 \mid X < 3)$.

2 marks

Question 10 (6 marks)

Part of the graph of $y = f(x)$, where $f : \mathbb{R} \rightarrow \mathbb{R}$, is given below. The three points A , B and C lie on the curve with coordinates $(-p, f(-p))$, $(0, f(0))$ and $(p, f(p))$, respectively. The three points A , B and C lie on a straight line.

- a.** Find the gradient of the line segments AB and BC and, **hence**, show that $\frac{f(p) + f(-p)}{2} = f(0)$.

1 mark

- b. i.** Let $p = 3$ and $f(x) = -x^3 + bx^2 + cx + d$ for $b, c, d \in \mathbb{R}$. Show that $b = 0$.

2 marks

- ii.** Find the coordinates of the points on the curve, in terms of c and d , such that a tangent line drawn to the curve at these points is parallel to the line AC .

3 marks
